

Assignment Module Flow - Color Highlighted

Step	Module Flow
1	Admin / Instructor opens Assignment Module
2	Select Course from Dropdown
3	Create Assignment and Save into assignments table
4	Assignment shown to Students (Temporary: all courses visible)
5	Student submits assignment file
6	Submission stored in assignment_submissions table
7	Admin / Instructor reviews submission
8	Grade and feedback given to student

Temporary Logic: Because payment is not integrated, all students currently see all course assignments.

Future Logic: Assignment visibility should depend on purchased/enrolled courses.
